*This file describes the purpose of World Cultures.*

**Keywords:** *World Cultures*

*World Cultures* provides scholars and students of culture with the benefits of a fifty year old tradition in cross-cultural research - access to most of the important published and unpublished comparative research materials on human cultures by established leaders in the field as well as new contributors. These materials are published in succinct form, commonly as aggregate cultural data in coded form on a large sample of societies, interpreted with the aid of detailed codebooks. Auxiliary materials include sampling frames, bibliographies, descriptions of societal foci, and programs for displaying relationships or distributions in tables, maps, or other forms. The electronic journal does not include the ethnographic publications from which most of the coded data is derived via expert readers, judges, or coders. The provision of such materials is the function of a library or archival system, such as the Human Relations Area Files. Besides ethnographic data, *World Cultures* publishes data from such diverse sources as historical, economic, or political analyses, weather stations or satellites, such as are applicable to ethnographically described societies and their ecosystems.

The electronic journal provides text and numerical file data in a form for manipulation by electronic word processors, statistical packages, and graphics software. General purpose software may occasionally be distributed with the journal under the shareware concept. The reader may tailor the journal to his/her own needs, programs, and applications. Special purpose or instructional software may occasionally be provided such as is made available by contributors.
