Created *Month Year;* Last Updated *Month Year*

General Guidelines

- *Update the header **Module Title** and Month Year* information
- *Use the Aptos font at size 11 for main body text*
- *Delete all italicized and greyed guidelines when the script is complete.*
- *Replace italicized and blue-highlighted text with appropriate text*
- *Refrain from referencing relative time to extend the longevity of the materials (e.g., do not say 'last year, the IPCC released their report on climate change.' Instead say, 'In the IPCC report on climate change released in 2024…'*

Video Title

This section should briefly outline the contents of the video script. Include 1-2 sentences that provide an overview of the content covered. In the bulleted lists identify the learning objective(s) of the video, and the 1-3 skill(s) that is covered.

Learning Objectives

- *Learning Objective 1*

GIScience Skills

- *Skill 1*

General Guidelines

- *Replace 'Video Title' header with the title of the video*
- *The file name should be the title of the video*
- *Videos should focus on 1-2 primary concepts*
- *Videos will ideally be less than 5mins in length. If more time is required, consider segmenting the script into two parts. If the script is split, include a '-part-1', 'part-2' suffix to the file name to indicate the suggested sequencing.*
- *Identify the learning objective from the module that the video corresponds to. In some cases, the video may only provide context or some summary function. If no learning objective applies, delete that sub-section.*
- *Identify the GIS Skills the video covers. In some cases, the video may not be tied to a GIS skill. If no GIS skill applies, delete that sub-section.*
