Radiology Resident Readings

A quick guide to running a relevant search for radiology readings

Erik Fausak, MSLIS, RVT

Health Sciences Librarian

University Library, University of California, Davis

These searches are pre-built to meet the journal expectations for board review. Essentially the searches are either just the contents of radiology specialty journals or limited to diagnostic imaging in generalized veterinary journals.

Executing the Search

- 1) locate the search strategy by following the link to the [search strategy](#). Once there, copy the search to clipboard (a red button – see Figure 1)

(SRCTITLE ("Veterinary Radiology and Ultrasound")) OR ((SRCTITLE ("Radiographics" OR "Radiology")) AND (TITLE-ABS-KEY (dogs OR dogs OR cats OR canine OR feline OR cats OR ferret* OR ferrets OR rabbits OR rabbits OR horse OR horses OR equine OR horses OR reptiles OR avian OR birds OR iguana OR raptor OR owl OR hawk OR lizard))) OR ((TITLE-ABS-KEY (scintigraphy OR mri OR "magnetic resonance imaging" OR "computed tomography" OR radiograph* OR radiolog* OR "diagnostic imaging" OR "diagnostic imaging" OR mri OR ct OR ultrasound OR "nuclear medicine" OR dr OR fluoroscopy OR echocardiography OR "radionuclide imaging" OR "magnetic resonance imaging" OR "tomography, x-ray computed" OR ultrasonography OR echocardiography)) AND ((SRCTITLE ("Journal of the American Veterinary Medical Association") OR SRCTITLE ("American Journal of Veterinary Research") OR SRCTITLE ("Veterinary Clinics of North America Exotic Animal Practice") OR SRCTITLE ("Veterinary Clinics of North America Food Animal Practice") OR SRCTITLE ("Veterinary Clinics of North America Equine Practice") OR SRCTITLE ("Veterinary Clinics of North America Large Animal Practice") OR SRCTITLE ("Veterinary Clinics of North America Small Animal Practice") OR SRCTITLE ("Journal of Veterinary Internal Medicine") OR SRCTITLE ("Equine Veterinary Journal") OR SRCTITLE ("Frontiers in Veterinary Science")))))

Appraisal

Figure 1 Example of how to copy to clipboard from link to SearchRXiv

- 2) Navigate to [Scopus](#) (on [VPN](#) or Single Sign On with your Kerberos) – see Figure 2
- 3) Choose “Advanced Document Search” in Scopus and paste search in box – see Figure 3.
- 4) Run the search.

Prioritizing search/results

Next, identifying the right

- 1) First organize your citations by which ones have been cited the most (the higher citation, the higher influence and potentially relevant question for boards*)- See Figure 4. Go to "Sort By" on the top right. Older articles, by nature will have higher citations than new ones, you may want to limit your results by years.

- 2) On the left there is a dial to control years, you can limit to the last year, last five years, last ten years, etc... see figure 5.
- 3) Additional considerations is to prioritize level of evidence: cohorts -> cross-sectional -> case control -> case series -> case study. Reviews tend to be higher cited than primary studies.

*higher citations are not indications of article quality, but of academic uptake.

equine OR horses OR reptiles OR avian OR birds OR iguana OR raptor OR owl OR hawk OR lizard)) OR ((TITLE-ABS-KEY (ACVIM consensus statement guidelines on diagnosing and distinguishing low-grade neoplastic from inflammatory lymphocytic chronic enteropathies in cats)))
